

DISASTER PREPARATION

Preparing for disasters in advance

Is your organisation disaster ready?

During a disaster, there is little time to react. Advanced planning will ensure better outcomes.

Mandalay strongly encourages forward planning to ensure your waste function can continue as best it can following a disaster event.

Having tools ready in advance of an event limits the effort required when disaster does strike. In the same way you prepare a response plan for road conditions, impact to community and physical clean up, preparing for data capture and on-the-ground support means that you are already confident that an approach will be fit for purpose.

- ✓ Make operational decisions with confidence.
- ✓ Meet disaster relief program requirements through accurate data capture.
- ✓ Give your team confidence through the support of a disaster experienced response team to help tackle challenges of transaction and data capture before they arise.

Key areas where Mandalay can support your disaster preparation

Best Practice Data Collection and Gatehouse Operation

Ensure data sets are ready for use when you need them, that they are relevant to your region and align with Council's planned disaster response.

What Mandalay Can Offer

Mandalay can provide recommendations regarding **best practice data collection and gatehouse operation** methods within a disaster environment.

✓ **Disaster Transaction Capture Process**

Creation of a disaster transaction capture process that suits your gatehouse process, and your disaster approach, with buttons, regulatory settings and dedicated products set up in your transactional system, ready in case of emergency.

✓ **Disaster Specific Data Set**

Our team will workshop the data set that you need for disaster response and ensure that it meets both weighed and non-weighed scenario's and is suitable to both existing or temporary disposal facilities. Mandalay can also create process documents and cheat sheets to assist your team on the ground and explain the intent of the disaster data set.

✓ **Data Setup and Reporting Formats**

We can facilitate your team to set the data up, ready for use, or this can be actioned for you. Additionally, reporting formats can be created in advance to report on transactions during disaster.

Disaster Waste Data Collection

The uncertainty caused by disaster extends to our methods of response, and having experienced partners to ensure that suitable methods are in place for data collection removes the burden of another risk for your team to manage and provides confidence that processes are tried and tested.

What Mandalay Can Offer

Disaster waste data can be collected utilising manual tally sheets that have been customised to suit Council's requirements regarding rapid data collection. This system can be used in both an existing site environment and for use at temporary disaster locations.

Customised Documents

Be it manual tally sheets for ease of use in a temporary transfer station, or vehicle load size and waste type flyers to assist contractors and volunteers to understand how to measure and accept waste to meet criteria's during a disaster, our team can create custom documents from our range of existing frameworks.

Data Collection Procedures

Establishment of document flows, audit trails and data entry to ensure that no data is missed.

Mandalay's Capabilities

Daily Reporting and Data Collation

Externalising your reporting provides the flexibility of an experienced team preparing information as and when it is needed. This can also improve the timeliness and confidence of information.

What Mandalay Can Offer

Daily reporting and data collation provided by Mandalay's remote team.

✓ Collation of Operational Findings and Identifying Trends

Behind the scenes, Mandalay's team will utilise reporting and data analytics to collate operational findings and report trends back to you.

✓ Regular Reporting

Reporting provided at regular intervals can assist with messaging to the community for Council's executive, decision making in regard to volume and traffic impacts at specific facilities.

✓ Graphical Representation of Data

We can even convert this information into graphical representation of statistical data at frequent intervals to support community and political messaging.

✓ Access to a Flexible Team

Flexibility to have an experienced team preparing information as it's needed.
